

I used fundamental CSS concepts like margin, padding, display, text-align, and flexbox to structure the layout. First, I analyzed the design, structured my HTML, and applied spacing and alignment techniques. Regular browser checks helped refine the layout.

I struggled with element positioning and text breaking. Flexbox properties like justify-content and align-items improved alignment, while using helped manage text breaks without disrupting the layout.

Time Taken:

I finished the assignment for around 3 hours
